 The Astronomical Journal

Naturally weighted yielding the synthesized beam shown in the lower right. Contours are labeled with values 1.862, 2.884 Jy Bm⁻¹ km s⁻¹ ($\sim 2 \times 10^{19}$ to $\sim 1 \times 10^{21}$ atoms cm⁻² or 4.1×10^{19} to 4.1×10^{21} atoms cm⁻²). Velocity greyscales increase from light to dark. The contours are evenly spaced.
